

Custom Cut-Outs are life size reproductions of people or scenes that can be used as props for tradeshow displays or to portray historical figures in museum or interpretative displays.

Massive Graphics can reproduce these from supplied photography or can stage the photograph in our studio.

Custom Cut-Outs are fabricated with full colour vinyl adhered to either 3mm or 6mm thick pvc board. Each cut-out is laminated with a protective film to prevent glare under display lighting and to prolong the life of the print. The bases are fabricated with hidden supports. Some cut-outs, depending on size and content can be manufactured in several pieces for easier transport.
