

Massive Graphics' Truss systems are available in a large variety of custom configurations. These systems are made from premanufactured aluminum truss pieces. They are made in various lengths and shapes and can be assembled to suit any space requirement from 10' wide and up. Please contact Massive Graphics to discuss custom and stock configurations.

The graphic panels for the Massive Graphic's Truss Systems can be made from many types of materials. Lycra Spandex is a popular material as it can be stored in a very small space and prints with vibrant colours. Other materials are available depending on the application.

The Truss Systems come with cases as required by your chosen configuration.
